

PRIMAL MOTORSPORTS

Strategic Portal Development & Infrastructure Partnership

Ownership Structure · Growth Infrastructure · Long-Term
Scalability

Prepared for:
Primal Motorsports

Prepared by:
Kreate by Design (KXD)

Executive Summary

Kreate by Design (KXD) is proposing a phased development partnership focused on building the operational infrastructure behind Primal Motorsports' future growth.

The objective of this partnership is not simply to build a website or booking form.

The objective is to create a scalable operational ecosystem capable of:

- Increasing driving school bookings
- Improving conversion rates
- Reducing booking friction
- Centralizing customer communication
- Streamlining internal operations
- Automating customer follow-up
- Improving customer retention
- Supporting future growth phases
- Creating a long-term scalable infrastructure for Primal Motorsports

This system is being designed intentionally as a long-term business asset for Primal Motorsports.

Current Growth Infrastructure

Existing Marketing Partnership

Current Monthly Retainer: \$1,200/month

Current services being provided include:

- Search campaign optimization
- Landing page optimization
- SEO recovery & optimization
- Reporting & analytics
- Conversion tracking
- Campaign strategy
- Ongoing performance optimization
- Lite web support and updates

The current marketing structure is already helping Primal build momentum through paid search, SEO recovery, landing page optimization, and improved customer acquisition strategy.

The long-term objective is to continue improving customer acquisition while simultaneously building the backend infrastructure capable of scaling those operations efficiently.

Phase 1 Portal Infrastructure Development

Investment

\$16,500

Phase 1 establishes the operational foundation of the Primal Portal.

This phase focuses on building the core infrastructure required to support customer acquisition, booking management, operational workflows, customer communication, and future scalability.

This is not a basic web build.

This is the beginning of a custom operational platform designed around Primal Motorsports' driving school, customer journey, sales flow, and backend processes.

Phase 1 Scope of Development

1. Optimized Booking Infrastructure

Development of a streamlined customer booking experience designed to reduce friction and improve conversion rates.

Features may include:

- Streamlined booking flow
- Reservation management
- Deposit handling
- Flexible payment workflows
- Customer intake processes
- Course selection workflows
- Booking status tracking
- Mobile-optimized booking experience

- Booking confirmation systems

Primary goal:

Increase completed course bookings while simplifying the customer experience.

2. AES Digital Signature Integration

Integration of AES-grade digital signature systems for operational efficiency and compliance.

Features may include:

- Waiver signing
- Contract execution
- Insurance documentation
- Browser-based signing workflows
- Audit-ready records
- Automated document storage
- Customer signature history

Primary goal:

Reduce manual paperwork, improve compliance, and streamline operational workflows.

3. CRM Infrastructure

Development of a centralized customer relationship management system.

Features may include:

- Customer database management
- Read/unread lead management
- Inquiry tracking
- Customer communication history
- Internal customer notes
- Lead ownership assignment
- Booking lifecycle tracking
- Customer segmentation

- Pipeline organization

Primary goal:

Create centralized visibility into customer activity, lead progression, and booking status.

4. Automated Lifecycle Systems

Development of automated customer engagement workflows.

Features may include:

- Automated customer follow-up
- Booking reminder sequences
- Upsell workflows
- Re-engagement campaigns
- Abandoned inquiry follow-up
- Automated branded communication templates
- Customer status triggers
- Retention workflows

Primary goal:

Increase bookings and customer retention through automated communication and better lead follow-up.

5. Backend Operational Infrastructure

Development of the foundational backend architecture required to support future growth phases.

Features may include:

- System architecture planning
- Scalable infrastructure setup
- Deployment configuration
- API integrations
- Database structuring
- Security configuration

- Operational workflow planning
- Foundational scalability preparation

Primary goal:

Create infrastructure capable of supporting future development phases as Primal grows.

Why This Investment Makes Business Sense

The purpose of the Primal Portal is not simply to modernize operations.

The system is being designed to directly support revenue growth, customer conversion, operational efficiency, and long-term scalability.

Unlike traditional websites or disconnected booking tools, this infrastructure is intended to function as a centralized operational ecosystem for Primal Motorsports.

As advertising, SEO, customer volume, and operational complexity increase, the portal infrastructure helps ensure the business can scale efficiently while improving customer experience and operational visibility.

Even modest improvements in:

- booking conversion rates,
- lead follow-up,
- customer retention,
- operational efficiency,
- and repeat bookings

can compound significantly over time.

For example:

- A small increase in completed bookings each month can quickly offset the initial infrastructure investment.
- Improved customer follow-up and retention systems help maximize the value of every lead already being generated through advertising and SEO.
- Automated workflows reduce administrative overhead and allow the business to scale more efficiently.
- A centralized CRM and customer database creates long-term business value that compounds as customer volume increases.

The objective is to create infrastructure that not only supports growth, but actively helps drive it.

Expected Business Advantages

Increased Booking Conversion

A streamlined booking system reduces customer friction and simplifies the reservation process.

This may help increase:

- Completed course bookings
- Deposit conversions
- Mobile booking completion rates
- Customer confidence during checkout
- Repeat customer participation

Even a modest increase in conversion rates can significantly impact overall revenue over time.

Improved Lead Follow-Up

Customer inquiries can become fragmented across emails, forms, spreadsheets, and manual processes.

The CRM and automation systems are intended to:

- Centralize lead management
- Reduce missed follow-ups
- Automate customer communication
- Re-engage inactive leads
- Improve response consistency

This creates more opportunities to convert inbound traffic into booked customers.

Operational Efficiency

The portal infrastructure is intended to reduce manual administrative work by automating:

- Booking confirmations
- Customer follow-up
- Waiver signing
- Customer communication
- Booking status updates
- Customer history tracking

This allows Primal Motorsports to scale operations more efficiently without increasing backend administrative workload at the same pace.

Long-Term Customer Value

The CRM infrastructure allows Primal Motorsports to build a long-term customer database and marketing ecosystem.

This creates opportunities for:

- Repeat bookings
- Advanced course upsells
- Customer retention campaigns
- Event promotions
- Membership opportunities
- Future product/service expansion

Over time, the customer database itself becomes a valuable business asset.

Marketing & SEO Alignment

The portal development works directly alongside ongoing marketing and SEO efforts.

As advertising, SEO, and traffic volume increase, the portal infrastructure helps ensure:

- better lead capture,
- better customer tracking,

- improved conversion optimization
- and more efficient customer management.

This allows marketing performance and infrastructure performance to compound together over time.

Ownership & Business Protection

One of the primary goals of this partnership is ensuring that Primal Motorsports retains ownership and long-term control of its operational business infrastructure.

KXD fully understands the importance of protecting business continuity and avoiding dependency on any single vendor or development agency.

Accordingly, the platform will be structured intentionally so that Primal Motorsports maintains ownership and control of all core operational business assets.

Primal Motorsports Will Own

Primal Motorsports will retain ownership and control of:

- Production portal environment
- Customer data
- CRM data
- Booking records
- Customer communication records
- Domains
- Hosting infrastructure
- Analytics platforms
- Operational business accounts
- Business-facing platform assets
- Customer databases
- Business operational records
- Final production deployment environment

The long-term objective is for the platform infrastructure to ultimately be hosted and controlled directly under Primal Motorsports.

KXD Will Retain Ownership Of

Kreate by Design (KXD) retains ownership only of:

- Internal development methodologies
- Reusable code libraries
- Proprietary generalized frameworks
- Internal operational systems
- Non-client-specific backend tooling
- Internal deployment methodologies

This is standard development industry practice and does not restrict Primal Motorsports' ownership of its operational platform or business assets.

Long-Term Protection & Continuity

The platform is intentionally being structured so Primal Motorsports is protected long term.

If necessary in the future, Primal Motorsports would have the ability to:

- Transition hosting internally
- Transition development internally
- Work with another development provider
- Continue operating the platform independently
- Retain operational continuity
- Maintain access to customer data and infrastructure

The objective is to build a long-term strategic partnership based on value and performance, not dependency.

Ongoing Infrastructure & Growth Support

Portal Infrastructure & Support Retainer

\$800/month

This monthly support structure is designed to maintain platform stability, performance, optimization, security, and continued scalability.

This is separate from the existing marketing and growth retainer.

Monthly Infrastructure & Support Includes

- Infrastructure monitoring
- Maintenance updates
- Security management
- API support
- Bug fixes
- Booking workflow optimization
- CRM optimization
- Automation tuning
- Deployment management
- Operational support
- Customer experience improvements
- Feature planning
- Scalability consulting
- Technical troubleshooting
- Ongoing optimization recommendations

This support structure ensures the platform continues evolving alongside the growth of Primal Motorsports.

Recommended Agreement Structure

Recommended Term

24-Month Strategic Development Partnership

The recommended structure is a 24-month strategic development and growth partnership.

The portal infrastructure, customer lifecycle systems, SEO growth, automations, and booking optimization all compound over time.

This is not intended to function as a one-time static software build.

The platform is intended to evolve in phases alongside Primal Motorsports' growth.

The 24-month structure allows:

- platform stabilization,
- customer behavior analysis,
- conversion optimization,
- infrastructure scaling,
- CRM refinement,
- operational improvements,
- and phased feature expansion.

This also creates continuity between:

- marketing performance,
 - SEO growth,
 - customer acquisition,
 - operational systems,
 - and future infrastructure development.
-

Pricing Summary

Existing Marketing & Growth Retainer

\$1,200/month

Includes:

- SEO optimization
 - Reporting & analytics
 - Landing page optimization
 - Campaign management
 - Conversion optimization
 - Strategic growth planning
 - Lite web updates
 - Ongoing performance refinement
-

Phase 1 Portal Infrastructure Development

One-Time Investment: \$16,500

Includes:

- Booking infrastructure development
 - CRM system setup
 - AES digital signature integration
 - Lifecycle automation systems
 - Backend infrastructure architecture
 - Deployment & testing
 - Operational workflow systems
 - Foundational scalability planning
-

Portal Infrastructure & Support Retainer

\$800/month

Includes:

- Hosting oversight
- Infrastructure monitoring
- Maintenance & updates
- Security management
- API support

- Technical troubleshooting
 - CRM optimization
 - Booking flow improvements
 - Deployment management
 - Automation tuning
 - Ongoing platform optimization
-

Long-Term Growth Vision

Future development phases may include:

- Expanded automation systems
- Advanced customer dashboards
- Membership systems
- Mobile integrations
- Advanced analytics & reporting
- Customer retention systems
- Referral systems
- Enterprise operational tooling
- Internal team management tools
- AI-assisted workflows
- Advanced booking intelligence
- Enhanced marketing automation

The portal is intended to become the operational foundation supporting Primal Motorsports' continued growth.

Strategic Vision

The goal is not simply to build software.

The goal is to build the operational infrastructure that helps Primal Motorsports:

- increase revenue,
- increase course bookings,
- improve operational efficiency,

- automate customer management,
- improve customer retention,
- and establish long-term category leadership.

Kreate by Design's role is to serve as the long-term strategic development and optimization partner behind that growth while ensuring Primal Motorsports maintains ownership and control of its operational infrastructure.

Closing Summary

This partnership structure gives Primal Motorsports the best of both worlds:

- full ownership and long-term control of the business infrastructure being developed,
- continued strategic support from KXD and development partners,
- a scalable system designed to increase bookings and improve operations,
- a clear roadmap for future development phases,
- and protection against vendor lock-in or loss of control.

The intent is to build a serious long-term business asset for Primal Motorsports, not a temporary tool or agency-controlled system.
